

# DIGITAL GUARDIAN™

## Managed Security Program

### > DATA PROTECTION FOR COMPANIES WITH MORE IP THAN IT

#### Are You Properly Armed for the Security Battles Ahead?

Merging data protection with business operations is a balance between business priorities, budget pressures, and productivity requirements. It's a difficult task, made even more so when you don't have a dedicated IT staff or ready access to security experts. That's why effective data protection capable of managing insider and outsider threats has remained out of reach for all but the world's largest organizations. Until now.

Only Digital Guardian offers complete data protection as a fully managed service. It's the industry's only full-service, hosted data security solution backed by experts with 10+ years of implementation experience. With Digital Guardian Managed Security Program (MSP), organizations of all sizes can reach a superior state of data security and compliance faster, with less risk—and for a substantially lower total cost—than with any other approach to data protection.

### > YOU CHOOSE THE DELIVERY MODEL THAT BEST SUITS YOUR NEEDS

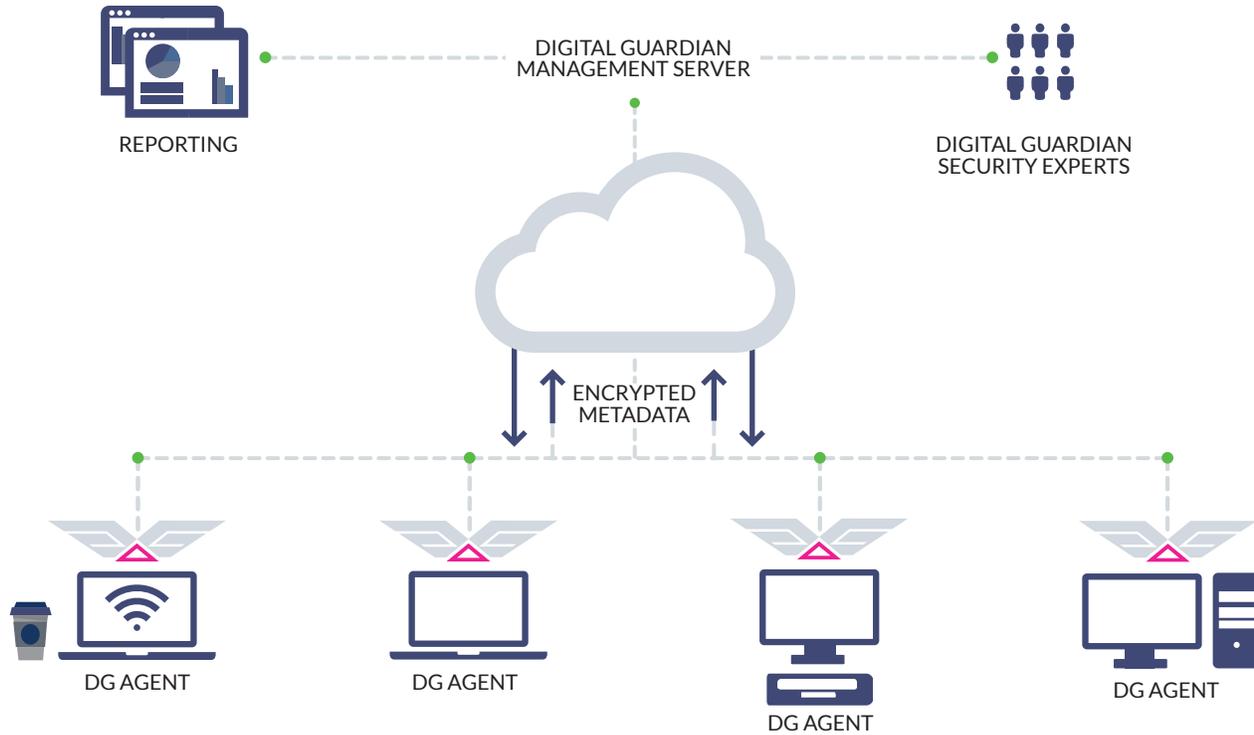

Digital Guardian MSP can be delivered in one of two ways -- a secure cloud-based, managed service or a hybrid on premise, managed service.

	Secure Cloud-Based Managed Service	Hybrid On Premise, Managed Service
INFRASTRUCTURE MANAGED BY	Digital Guardian	Customer
INFRASTRUCTURE HOST	DG Secure Cloud	Customer Data Center
DATA TRANSFERRED TO DG SECURE CLOUD	Encrypted, event metadata only	None. All data remains within the customer environment
SYSTEM ADMINISTERED BY	Digital Guardian Professional Services	Digital Guardian Professional Services
POLICIES, RULES AND REPORTS MANAGED BY	Digital Guardian Professional Services	Digital Guardian Professional Services
CUSTOMER STATUS MEETINGS	Weekly	Weekly
MANAGEMENT CONSOLE ACCESS	Via secure web portal	Via on premise login
BUDGET	OpEx	OpEx/CapEx

Regardless of the chosen MSP deployment model, as soon our experts have installed the Digital Guardian agents, you will immediately discover—in full forensic detail— where your sensitive data resides, who accesses it, and how it's transacted. As a MSP customer, you have access to the Digital Guardian Management Console to filter and drill into reports by policy rule, file name, type, sensitivity, user, alert, and event.

Digital Guardian MSP provide you with continuously updated security intelligence and trending reports on data location, usage, and risk through an intuitive interactive reporting dashboard. Its rich-event telemetry and advanced analytics allow security managers to easily share real-time insights with technical, business, and investigative stakeholders and precisely resolve the nature of data risks, policy effectiveness, and compliance rates with granularity ranging from executive summary to forensic-level clarity.

## > DIGITAL GUARDIAN MANAGED SECURITY PROGRAM

## > PROVIDING SECURITY EXPERTS SO YOU CAN FOCUS ON YOUR BUSINESS

### IMMEDIATE ACCESS TO SECURITY EXPERTS

Leverage the knowledge of experts with 10+ years' experience implementing mission-critical data security, risk, and compliance programs for Global 2000 companies and government agencies.

### INSTANT ON

With DG MSP you don't have to wait to complete a lengthy data discovery and classification project. You'll gain immediate visibility into data access and usage, and achieve security faster, with less risk.

### SECURE CLOUD OPTION

Your data remains private and secured at all times. With Digital Guardian's secure, cloud based delivery option, no content is ever transmitted, recorded, or stored. All metadata is encrypted, hashed, and digitally signed before secure transfer to Digital Guardian's hosting facilities via FIPS 140-2 certified messaging protocol.

## ABOUT DIGITAL GUARDIAN

At Digital Guardian, we believe in data. We know that within your data are your company's most valuable assets. The sum total of innovations, plans and potential. We protect your company's sensitive information like it's our own so you can minimize risk without diminishing returns.

For over 10 years we've enabled data-rich organizations to prevent data loss at the endpoint. Our expert security team and proven Digital Guardian platform radically improve your defense against insider and outsider threats.

Hundreds of customers across a wide range of industries rely on Digital Guardian to protect their critical information at the point of risk. Seven of the top ten IP holders and five of the top ten auto companies trust us with the integrity of their most valuable and vulnerable data. We take pride in knowing that, at this very moment, Digital Guardian agents are securing the sensitive data of the world's most inventive, influential companies.
