Today’s malware is sophisticated, targeted and difficult to detect. With the speed of new threats accelerating, attacks have become inevitable. On the other hand, building and retaining a team of cyber security experts that can detect, respond and remediate these attacks can be incredibly challenging.

Digital Guardian’s Managed Detection & Response (MDR) is led by an elite cybersecurity expert who built the SOC for a Fortune 100 company where sensitive IP was the life blood of the organization. Our elite team of experts proactively hunt, detect and respond to attacks in real-time to contain ransomware and other advanced threats before your organization’s sensitive data is breached.

Our service provides the highest level of protection of your data from:
- Zero-day attacks
- Polymorphic Malware
- Fileless Malware
- Ransomware

“With its data-driven approach, Digital Guardian applies analytics to users and content to classify anomalous behaviors, detecting threats from those outside and inside the organization.”

A Program-Based Approach

Digital Guardian’s unique approach for solving data protection challenges is to offer a proven combination of people, process and technology.

**People**
Cybersecurity experts led by a former Fortune 100 cyber-defense leader

**Process**
Proven methodology for Incident Response and Threat Hunting

**Technology**
Detection and response technology that has the contextual understanding to protect your data from all threats
What You Get

Current State Gap Analysis
- Initial deep dive review by our MDR team
- Formal presentation with review of identified threats and mediation recommendations

Advanced Threat Policy Deployment, Maintenance & Updating
- 200+ behavior based rules for threat detection & response on the endpoint
- Triage, tuning &/or whitelisting for alerts & alarms

Proven Cyber Experts “Eyes on Glass” at Your Service
- Alert triage & notification of high fidelity alerts
- Alert analysis includes root causes or entrance vectors, remediation recommendations
- Remote incident response and threat neutralization support
- Proactive threat hunting looking for IOCs and IOAs

Ongoing Threat Intelligence
- DG team harnesses external & internal intelligence feeds for immediate detection based on known threat activity
- Advanced network device, SIEM, VirusTotal and custom threat feed integration available

Advanced Cyber Threat Alerting and Reporting
- Executive level reporting on cyber threat activity
- Process usage, threat scan and alerts reporting

Why Digital Guardian Managed Detection & Response

1 Fill Your Security Talent Gap
Leverage our incident responders and threat hunters with experience building incident response and threat hunting programs at data-sensitive Fortune 100 companies.

2 Get Detection & Response That Works
Standing up EDR technology and a successful cyber threat program is complex and resource intensive. Even some of the largest companies turn to our MDR team for effective protection.

3 Use The Resources You Have More Effectively
With the DG MDR team managing the infrastructure and the administration, your team can focus on governance and proactive security.

4 Achieve Exceptional Time to Value
Our customers repeatedly tell us that they were able to establish or improve their detection and response program faster than they ever could have done by themselves, or with any other vendor.

5 Take Advantage of Our Programmatic Best Practices
You gain the benefit of our insights, experiences, and processes protecting the most critical information for hundreds of customers across a wide range of industries.
