

FORTRA

DATASHEET (Digital Guardian)

Fortra Data Protection

Your business is not static, nor is the data that drives it. Your data is growing and changing by the moment, and all that data – from patient information to board room reports to Intellectual Property – is at risk for loss or theft. With hybrid work environments making remote collaboration a reality of daily business, and companies choosing to migrate technology to the cloud for both cost-savings and efficiency purposes, enterprise data protection solutions are more important than ever to protect regardless of where it is or how it's used.

Why Fortra

Fortra offers world-class infrastructure protection, data security, intelligence, and automation solutions. Over 30,000 loyal customers worldwide trust us to help them create a simpler, smarter, more powerful IT. Partner with us because of our:

- Commitment to Cybersecurity
- Exceptional Support
- Breadth of Solutions
- Vendor Stability

Identifying your most sensitive data and protecting it wherever it travels is the heart of an effective data governance program. Fortra offers comprehensive data protection with powerful, modular solutions.

Cloud delivered DLP enforces data protection across the entire extended enterprise.

Data classification allows you to understand, prioritize, and improve data protection programs.

Digital rights management (DRM) encrypts and controls access to files wherever they travel.

The Importance of Data Protection

- IDC estimates that by 2025, 463 exabytes of data will be created every single day.
- According to the Verizon Data Breach Incident Report, 85% of breaches in 2021 involved the human element.
- A third of breaches in 2021 were due to Insider threats (Forrester).

Fortra Data Protection includes:

- Digital Guardian Data Loss Prevention
- Titus and Boldon James Data Classification
- Vera Digital Rights Management

Digital Guardian

Data Loss Prevention

Digital Guardian's Data Protection Platform performs on traditional endpoints, across the corporate network, and on cloud applications. Endpoint DLP provides visibility, auditing, and control, with the ability to add classification (context, content, or user-controlled), network DLP, and discovery capabilities as well.

Key Features:

- Cloud delivered, powered by AWS, data protection platform delivers enterprise data protection without complexity
- Enterprise wide visibility and controls across the leading operating systems, browsers, and applications, eliminating gaps in your data protection program
- Flexible controls, from log to block, provide you with the power to maintain control over your sensitive data

Titus

Data Classification

Boldon James

Data Classification

Titus and Boldon James apply visual and metadata labels to ensure data is protected and controlled wherever it travels. From user-driven, to fully automated, our solutions are fully flexible and customizable to meet your data protection requirements.

Key Features:

- Achieve compliance with the growing number of global, national, and industry-specific regulations around data and privacy protection
- Identify, classify, and secure your sensitive data across platforms, devices, and in the cloud
- A fully customizable solution designed to meet the needs of your business now, and in the future

Vera

Digital Rights Management

Vera makes it easy to securely share files externally with third parties, providing you control over file access and protection wherever data travels.

Key Features:

- Secure data automatically when shared internally and externally
- Track data as it's accessed throughout its lifecycle
- Audit data as it travels and mitigate compliance concerns
- Revoke access to sensitive data and files shared with departing employees and third-party providers

Our Solutions

If you'd like to better protect sensitive data from loss or theft, contact us at helpsystems.com to schedule a consultation or talk to one of our solutions experts.
