

# DIGITAL GUARDIAN®

## Managed Security Program for Advanced Threat Protection

### > LET OUR SECURITY EXPERTS DETECT AND RESPOND TO DATA THREATS

Today's malware is sophisticated, targeted and difficult to detect. With the speed of new threats accelerating, attacks have become inevitable. On the other hand, finding and retaining cyber security experts can be incredibly challenging.

Our Advanced Threat Protection Managed Security Program is led by Director of Cybersecurity, Tim Bandos, a former cyber security leader for a Fortune 100 company. The program combines security researchers and analysts' expertise, Digital Guardian's Next Generation Data Protection Platform and a centralized threat intelligence management system. This combination enables Digital Guardian to detect and remediate threats faster and more efficiently.

#### OUR SERVICE CAN PROVIDE THE HIGHEST LEVEL OF PROTECTION FROM:

- Zero-day attacks
- Polymorphic Malware
- Ransomware
- Attacks involving the most sophisticated data theft methods

“Select vendors, such as Digital Guardian, combine EDR with endpoint DLP and utilize their enhanced awareness of sensitive and regulated data in their threat detection and response mission.”

-Gartner May 2016, Endpoint Detection and Response Tool Architecture and Operations Practices

### > OUR APPROACH - PEOPLE, PROCESS AND TECHNOLOGY

Digital Guardian's unique approach for solving advanced threat protection challenges is to offer a proven combination of people, process and technology. Our cyber security experts have over 20 years of experience in threat hunting, incident response, threat research, threat intelligence, investigation and mitigation. Digital Guardian's industry leading ATP technology combined with our data-centric detection and response methodology is the industry's only advanced threat protection solution that truly protects you from all threat types.

#### People

Cyber security experts led by a fortune 100 cyber defense leader

#### Technology

Detection and response technology that understands and protects your data

#### Process

Proven methodology for managed IR and Threat Hunting

## > WHAT YOU GET

### FULLY MANAGED ATP INFRASTRUCTURE

- Implementation and management of your advanced threat protection infrastructure
- No in-house infrastructure or subject expertise required

### PROACTIVE THREAT HUNTING AND INCIDENT RESPONSE

With its proven incident response and threat hunting methodologies, our MSP team hunts, detects and responds to attacks in real-time

### PREVENT ATTACKS IN REAL-TIME

- Dedicated team of analysts review your data 24\*7 for anomalous behavior and alert you immediately upon discovery.
- Alerts generated by our MSP team will provide you with a summary of what's been detected and include details such as entrance vector, root cause, endpoints affected, etc.

### ONGOING THREAT INTELLIGENCE

Our team harnesses both externally and internally generated intelligence feeds for immediate detection based on known threat activity

## > WHY DIGITAL GUARDIAN MSP FOR ADVANCED THREAT PROTECTION?

1

### INSTANT TIME-TO-VALUE

Implementing advanced threat solutions in-house can take anywhere between 6 months to 2 years. Digital Guardian's managed security program for ATP gets you instant start within a week

2

### 24\*7 EXPERTS SUPPORT

Our cyber security experts are constantly reviewing your data for anomalous behavior and alerting you immediately upon discovery

3

### HUNT PROACTIVELY AND RESPOND IMMEDIATELY

Our proven Incident Response and Threat Hunting methodologies help your operationalize these complex tasks and respond to threats immediately

4

### DATA-CENTRIC THREAT PROTECTION

Industry's only Advanced Threat solution that fully understands and protects your DATA. Our MSP for ATP protects from multiple sources of attacks - malware, malware-free attacks and other suspicious data movements/egress

## ABOUT DIGITAL GUARDIAN

Digital Guardian is the only data aware security platform designed to stop data theft. The Digital Guardian platform performs across traditional endpoints, mobile devices and cloud applications to make it easier to see and stop all threats to sensitive data. For more than 10 years we've enabled data-rich organizations to protect their most

valuable assets with an on premise deployment or an outsourced managed security program (MSP). Our unique data awareness and transformative endpoint visibility, combined with behavioral threat detection and response, let you protect data without slowing the pace of your business.
