

Digital Guardian Is A Leader In Data Loss Prevention Suites

Excerpted From The Forrester Wave™: Data Loss Prevention Suites, Q4 2016

by Heidi Shey

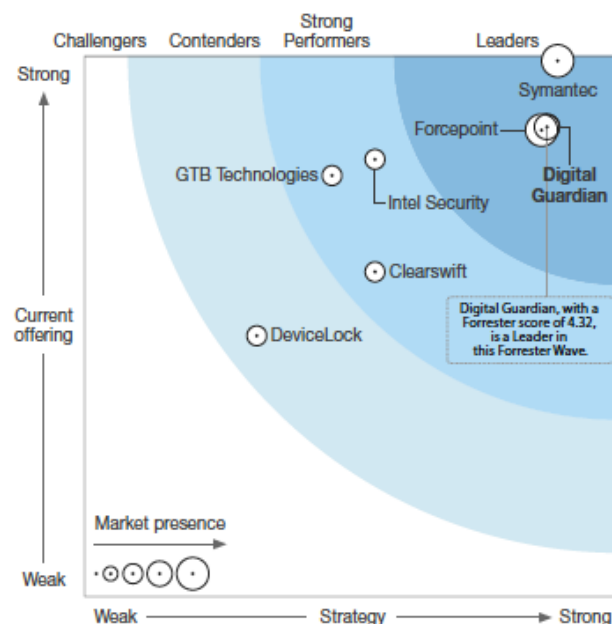

with Stephanie Balaouras, Alexander Spiliotes, and Peggy Dostie

November 8, 2016

Digital Guardian brings together two in-demand enterprise security capabilities today: DLP and endpoint visibility and control (EVC). A strong focus on strategic partnerships augments the company's information management capabilities. It also has a popular DLP-as-a-managed-service offering that now includes local UK and EU hosting options. This option also allows Digital Guardian to service small (e.g., as few as 10 seats) and mid-market firms, in addition to providing the option for enterprise.

Digital Guardian has the smallest customer base among the vendors evaluated in this Forrester Wave, and has room for improvement when it comes to developing capabilities for mobile DLP. It will continue to develop its platform to go beyond DLP and include focus on other areas like advanced threat protection. Firms that require DLP across Windows, Mac, and Linux OSes or have an interest in DLP-as-a-managed-service should consider Digital Guardian.
